

Worldox® Cloud Australia

The power and convenience of Worldox Cloud NOW available in Australia!

Worldox Cloud Australia is an innovative document management solution that provides the powerful features of the proven Worldox DMS, but generates even more expediency and flexibility through the utilization of Software-as-a-Service (SaaS) technology and cloud computing.

Worldox Cloud uses a patent-pending communications platform to seamlessly connect cloud servers hosting the Worldox application and all Worldox-managed documents to local applications. Users see their familiar desktops, not separate, self-contained environments. If you don't tell them their files are in the cloud, they'd probably never know. It's completely transparent.

Hosted in Australia All your data is securely hosted in a Australian data centre, on a platform designed for law firms.

Automated, frequent back-ups in our cloud servers.

No on-site servers or other hardware needed.

Completely secure. Meets rigorous standards for data communication and integrity.

No up-front software purchase is required. Instead, pay a low monthly fee.

Flexible, remote access. At the office, at home, at client sites—mobility anywhere, anytime.

No hidden costs. Email management, local backup copy, client matter update automation and more, are included in the base price.

World-class technical support. Best-in-the- business, award-winning customer phone and online support are included.

Zero Download Technology for amazingly fast launching of large PDF files.

All the ease
of Worldox Cloud
on a platform built
for Australian
law firms

Worldox Cloud Australia Hosted and supported by Matrix Solutions

Worldox® Cloud Australia

Award-winning Document Management - Now in the Cloud!

Worldox has long been a top DMS choice for legal and financial advisory firms, academic law departments and industrial firms too.

It has a powerful feature set and a remarkably easy-to-use interface. Now the new Worldox Cloud Australia offers those same tools via cloud deployment—quick and seamless document access for Australian firms that choose to manage information in a remote, centralized data center model.

Worldox Cloud Australia delivers the proven advantages of Worldox with minimal up-front investment. New servers, software, maintenance or upgrades are not required. You get the same powerful DMS tools and same award-winning service. Best of all, Worldox Cloud is virtually identical in appearance, look and feel to the classic, network-hosted version of Worldox.

“Worldox Cloud is an ideal document management system for me because my firm is small and I have no dedicated IT department. Whether working at my desk, visiting clients, or in a hotel room, I have complete access to all of my client documents at all times, and have no concerns about keeping the servers running or the software up to date, or backing up my data. Integrating with Microsoft Outlook and the Fujitsu ScanSnap s1500 scanner, Worldox Cloud is the perfect complement to a hosted Exchange solution and online research services for a small practice professional like me.”

-David Thompson
